

Sport on the up

Two curvaceous residential towers are part of the new Bézier development by Tudor Vale Properties on the South East corner of Old Street roundabout which also includes a new sports pitch completed by Agripower Contractors. In a deal with the developer, the school sold the land in return for the building of a new sports pitch with a retractable roof which has been recently completed. The playing surface chosen was a 3 G synthetic surface compliant to both FIH and FIFA 1* standards.

"The pitch was on the second floor of a building and had to be accessed through a hole in the wall with all materials craned in," commented Trevor Gordon, Agripower Contractors Contracts Manager. "In all, over 130 tons in total was craned in which also

included all the plant and equipment used."
