

## Five New Timberplay sites enhance Boroughs of Hammersmith and Fulham

Timberplay have been awarded the contract to design and install 5 new play spaces, worth £300,000 in The London Borough of Hammersmith and Fulham, after a rigorous tendering procedure. Initially they completed an ESPO Design Competition and then had to satisfy a number of criteria, including 'Quality of the Design', 'Value for Money' and 'How the submitted design responded to the Site'.

Four out of the five sites have bespoke climbing equipment as their centre pieces that include a Timberwood Tangle, a large Climbing Forest and Climbing Structures.

## Huck Nets

[www.hucknetting.co.uk](http://www.hucknetting.co.uk)

Huck Play manufacture, supply and install innovative natural rope and net play equipment. Being manufactured mostly of rope and timber it is ideally suited to outdoor natural play environments. A recent play area, designed and installed by Huck Nets, is in West Bay, Bridport, Dorset. This unique play area has been designed to reflect its setting on the Jurassic Coast and the area's history of rope making. The Bridport Town Council worked with young people to develop and finalise the design which is based on a "ship" wrecked on the rocks, with robust climbing structures and swings. In the words of one 14 year old involved .. "it is a play area for everyone from 0-99"!!

## AGRIPOWER RIGHT ON TRACK

With they're continued success in the sportsturf and construction industries, Agripower Contractors are proud to announce their latest contract - Merchant Taylors Independent Boys School in Middlesex.

Agripower, based in Buckinghamshire, are one of the UK's leading sportsturf contractors and were selected to carry out the works against stiff competition from other companies.

The project consists of the construction of a 6 lane artificial running track, high jump and long jump facilities, 1st 15 rugby pitch, primary and secondary drainage systems, two full specification cricket squares, irrigation system and major earthwork re-modelling.

Work on site is due to commence in early April and is due to be completed within an 18 week programme.

The new project, which has been designed by Sportsturf Consulting will maximise and enhance the schools already great tradition of excellence in games and sport and form part of a much larger programme of other building and development projects. Many former pupils have won international honours while at the School or later as members of the OMT Club and Agripower hope that with the help of their specialist and in-house team of experts that this will continue.
