

## Desso iDNA pitch is part of £1.3 million sports project

Sports ground specialist Agripower Contractors has completed the installation of the first iDNA football pitch by Desso Sports Systems.

The sports facilities at Bradley Road in Grimsby were a single playing field with derelict old changing rooms. The new site now boasts enviable facilities including an irrigated, floodlit full size natural Premier pitch with seating, a full size Desso iDNA floodlit 3G synthetic pitch (to FA and Football Foundation specifications) and three full size natural training pitches which have been drained and sand ameliorated.

There is also attenuation for pavilion,

car parks and all pitch works, site secure fencing systems for the whole area, turnstiles and stands.

The decision to install Desso's iDNA pitch was made after the facility management team wanted a surface to play football on throughout the year and able to withstand heavy use.

Worth over £1.3 million, the project

was part-funded by North East Lincolnshire Council, the FA and the Football Foundation.

- Agripower has recently increased its fleet of specialist equipment with the purchase of a Caterpillar scraper for on-site material movement.
